September 2008

Check out the new **High Crimes** album recorded and mixed all in a barn!!

## WHERE HAS THE SUMMER GONE.....

The summer sure did fly by, huh? Soon we'll be eating turkey and pumpkin pie! Before we get ahead of ourselves, I'd like to catch you up on my summer and what's going on for the rest of the fall. [The High Crimes](#) and [Irie Sol](#) (both from Minneapolis, MN) albums are completed! These are very cool bands that

you should check out. My all analog studio, "[Welcome To 1979](#)" had a grand opening party earlier this month that was a smash hit with over 100 people in atten-

dance. Speaking of the studio, I just acquired several vintage keyboards including a B-3 w/Leslie, Wurlitzer, and a Fender Rhodes to really drive home the 1979 theme. I also bought a freaking metric ton of analog tape across the summer, so anyone booking a project between now and the end of the year will be offered **FREE TAPE!** I'm also doing a lot of "analog-ing" of digital tracks for people via FTP. It's simple and affordable- just FTP me your individual digital tracks (kicks, snares, etc) or completed mixes via my secure server, I run them through my console and tape machine and FTP them back to you. You get that fat analog sound right from the comfort of your own home- how sexy is that?? I've also been updating [chrismara.com](http://chrismara.com) with a videos page, studios page and updates to my gear list. Check it all out, and email me with any questions/comments.
